We will continue to pursue solar array powered electric-vehicle charging stations in the planned newly reconfigured rectangular parking lot directly across from the zoo. The zoo will pursue possibility of installing solar panels on the south-facing side of their buildings while it will be determined if any power from a solar panel array parking lot installation would potentially be shared with the zoo or other structures in Washington Park. *We are receiving FREE consulting, engineering, planning services for solar array installation, electric vehicle charging stations, and electronic device chargers for workstations at Washington Park, Beach, and Zoo. When completed, we will have choices to create a plan to submit for an extremely promising future with potential green energy funds provided by the Federal Government.*]
